

IEEE P2800.2 Update for i2X FIRST Post-Commissioning Workshop

ESIG Spring Workshop, Austin, Texas

ANDY HOKE, P2800.2 WG CHAIR

MANISH PATEL, SECRETARY

JENS BOEMER, BOB CUMMINGS, DIVYA KURTHAKOTI,

JULIA MATEVOSYAN, MAHESH MORJARIA, STEVE WURMLINGER, VICE CHAIRS

March 17, 2025

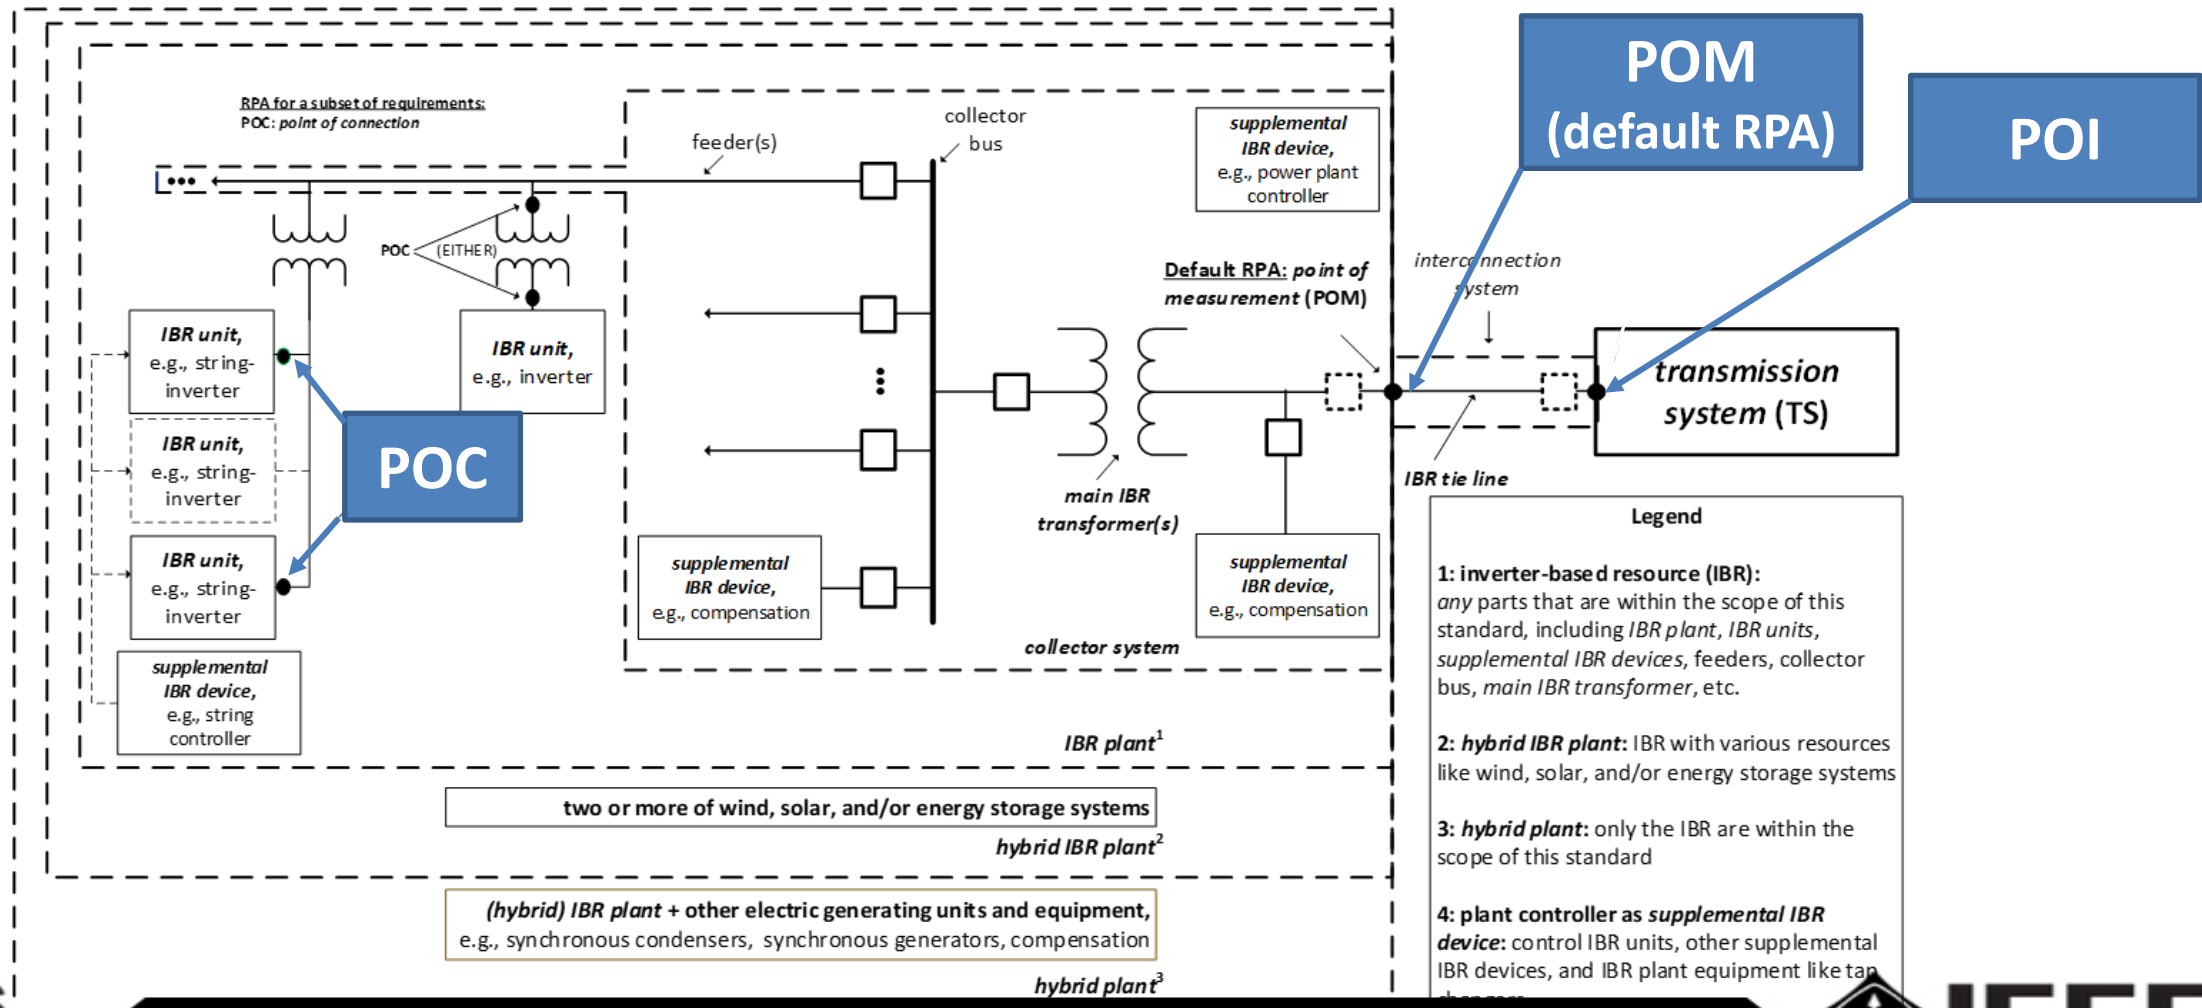

Some content derived from IEEE 2800 WG and Jens Boemer, 2800 WG Chair

Acknowledgements and disclaimers

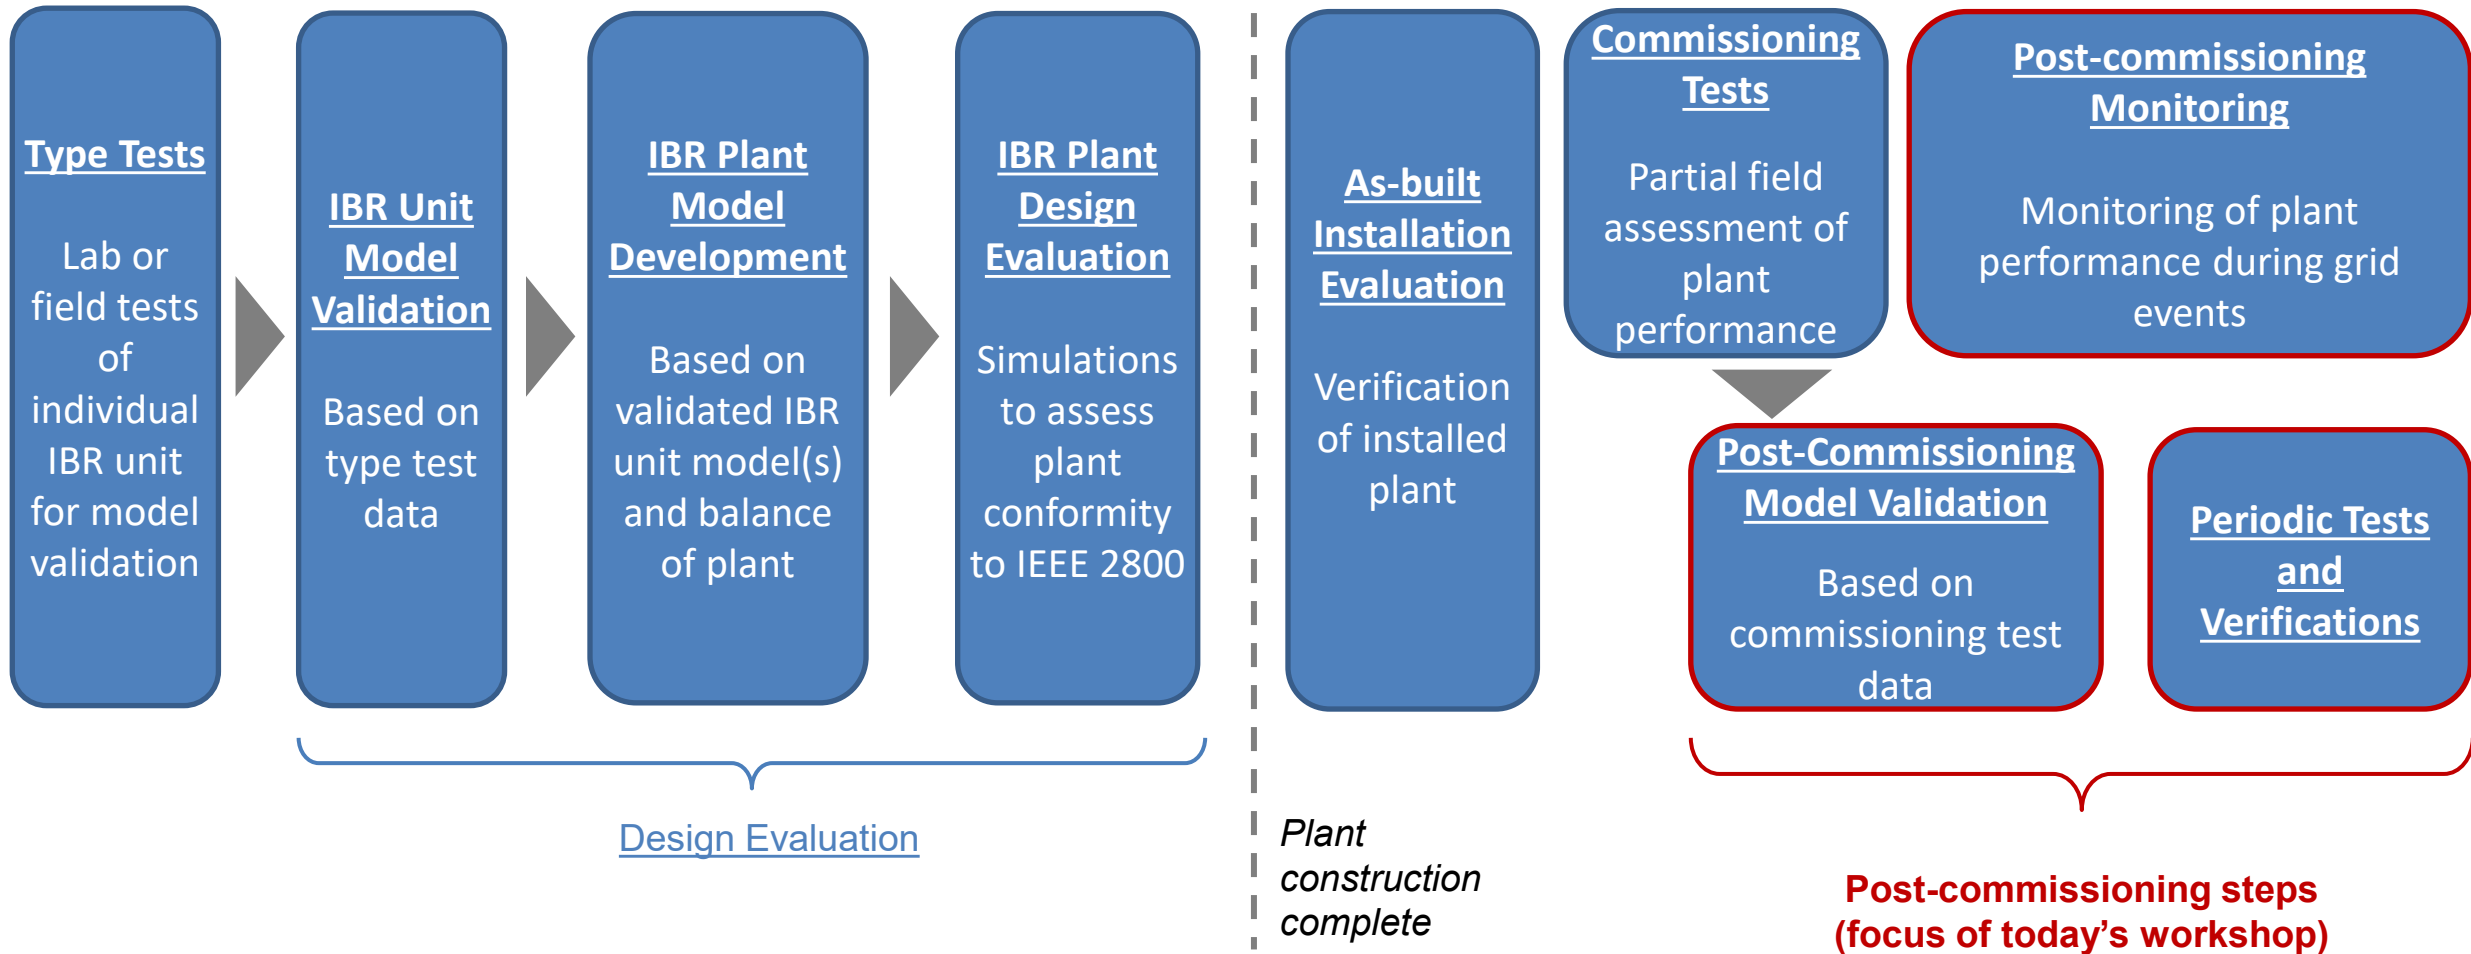

- General disclaimer:
 - The views presented in this presentation are the personal views of the individuals presenting it and shall not be considered the official position of the IEEE Standards Association or any of its committees and shall not be considered to be, nor be relied upon as, a formal position of IEEE, in accordance with IEEE Standards Association Standards Board Bylaws 5.2.1.6.
- Draft standard disclaimer:
 - P2800.2 is an unapproved draft of a proposed IEEE Standard. As such, the document is subject to change, any draft requirements and figures shown in this presentation may change.
- For those working group members whose effort on the standard was partially or fully supported by the U.S. DOE's National Renewable Energy Laboratory, the following statement applies:
 - This work was supported in part by the National Renewable Energy Laboratory, operated by Alliance for Sustainable Energy, LLC, for the U.S. Department of Energy (DOE) under Contract No. DE-AC36-08GO28308. Funding provided by U.S. Department of Energy Office of Energy Efficiency and Renewable Energy Solar Energy Technologies Office and Wind Energy Technologies Office. The views expressed in the article do not necessarily represent the views of the DOE or the U.S. Government.

Where do 2800 requirements apply?

Almost all requirements of IEEE 2800 apply at Point of Measurement (POM) by default

Overview of conformity assessment steps in IEEE P2800.2

IEEE P2800.2 Subgroup and Task Force Scopes

SG 1
Overall document and general requirements

Requirement	RPA at which requirement applies	SG 2	SG 3	SG 4		SG 5			
		Type tests	Design Evals.	Commissioning and As-built		Post-commissioning model validation, monitoring, etc.			
		IBR unit-level tests (at the POC)		IBR plant-level verifications (at the RPA)					
		Type tests ¹⁵²	Design evaluation (including modeling for most requirements)	As-built installation evaluation	Commissioning tests	Post-commissioning model validation	Post-commissioning monitoring	Periodic tests	Periodic verification
		Responsible Entity							
		IBR unit or supplemental IBR device manufacturer	IBR developer / TS owner / TS operator	IBR developer / TS owner / TS operator	IBR developer / TS owner / TS operator	IBR developer / IBR operator / TS owner / TS operator	IBR operator / TS owner / TS operator	IBR operator / TS owner / TS operator	IBR operator / TS owner / TS operator
4.12 Integration with TS grounding	POM	NR	R	R	NR	NR	NR	D	NR
Clause 5 Reactive Power—Voltage Control Requirements within the Continuous Operation Region									
5.1 Reactive power capability	POM	R	R	R	R	R	D	D	D
5.2 Voltage and reactive power control modes	POM	D	R	R	R	R	D	D	D
Clause 6 Active-Power—Frequency Response Requirements									
6.1 Primary Frequency Response (PFR)	POC & POM	NR ¹⁵³	R	R	R	R	D	D	D
6.2 Fast Frequency Response (FFR)	POC & POM	R ¹⁵⁴	R	R	R	R	D	D	D
Clause 7 Response to TS abnormal conditions									
7.2.2 Voltage disturbance ride-through requirements	POC ¹⁵⁵ & POM ¹⁵⁶	R	R	R	NR	R	R	D	D
Clause 8 Power quality									
8.2.2 Rapid voltage changes (RVC)	POM	NR	R	R	R	D	R	D	D
8.2.3 Flicker	POM	NR	NR	NR	R	D	R	N/A	D
8.3.1 Harmonic current distortion	POM	R ¹⁵⁷	R	R	R	D	R	N/A	D
8.3.2 Harmonic-voltage distortion	POM	D	D	D	D	D	D	D	D
8.4.1 Limitation of cumulative instantaneous over-voltage	POM	R	R	R	NR	NR	R	NR	NR
8.4.2 Limitation of over-voltage over one fundamental frequency period	POM	D	R	R	NR	NR	R	NR	NR

STAKEHOLDER GROUP

P2800.2 Working Group Timeline

Summary of comment resolutions (D2.0 → D3.0)

- 591 comments received on Draft 2.0
- 97% addressed. Remaining comments deferred*
 - 27% accepted (verbatim)
 - 48% revised (some change made)
 - 21% rejected (no change made)**

*Some deferred comments will be automatically resubmitted because they were assigned to wrong group and hence were not considered until too late. Affected commenters have been notified.

**Some comments were rejected with a response inviting commenter to resubmit for future consideration

Draft 3.0 currently under review and voting

- Draft 3.0 available for comment and voting until **March 24**
 - <https://iee-sa.imeetcentral.com/p2800-2/folder/WzlwLDE5MjM0OTQyXQ>
- Resolutions of comments on D2.0 can be seen here (and in redlines)
- Use comment spreadsheet template
- Use page/line numbers from D3.0 Clean
- Voting open to WG members only
- If vote passes, next step is IEEE-SA balloting. Expected to take about 9 months
- If vote fails, WG will continue to revise

The screenshot shows the IEEE SA Standards Association workspace interface. The top navigation bar includes the IEEE SA logo, a search bar, and menu items like 'Dashboard' and 'Workspaces'. The main content area is titled 'P2800-2 – Test and...' and shows a breadcrumb path: '... / Standards Devel... / Draft Standard(s) / Draft 3.0'. On the left, a 'Files by Folder' sidebar shows a tree structure with 'Draft 3.0 (8)' selected. The main file list includes:

- Consolidated Draft 2.0 WG Comments_v2_resolved_r1.xlsx (Anderson Hoke)
- BalloterCommentTemplate.xlsx (Anderson Hoke)
- P2800_2_Draft 3.0 Redline to Draft 2.0.docx (Manish Patel)
- P2800_2_Draft 3.0 Clean without Comments.docx (Manish Patel)
- P2800_2_Draft 3.0 Clean with Comments.docx (Manish Patel)
- P2800_2_Draft 3.0 Redline to Draft 2.0.pdf (Manish Patel)
- P2800_2_Draft 3.0 Clean with Comments.pdf (Manish Patel)
- P2800_2_Draft 3.0 Clean without Comments.pdf (Manish Patel)

Orange arrows point from the text in the left column to specific files in the screenshot. A dashed orange circle highlights a group of files.

Should D3.0 be sent to ballot?

- Sending draft to ballot does not mean it's ready to publish. It means draft is stable enough to start the ballot.
- If motion to go to ballot is approved, it allows WG leadership to initiate IEEE Mandatory Editorial Coordination (MEC), IEEE sponsoring committee review, and ballot pool formation
 - These are required steps that cannot happen until WG approves
- All WG members and interested parties will be invited to join IEEE-SA ballot pool
- Balloting is expected to take 4-5 recirculations over ~9 months and generate >1000 comments. This is likely true regardless of whether we start now.
- Content will be refined through IEEE-SA balloting process
- My opinion: Draft has the necessary content. WG could continue to refine the draft in the WG, but there are diminishing returns. We should start the ballot now.
 - Will WG agree? Do you agree?

How to join P2800.2 ballot pool

- Invitations will be sent to all who have expressed interest in P2800.2 via IEEE MyProject (instructions on next slide)
 - In past, people have missed ballot invitation due to spam filters and not recognizing the invitation. Must respond within defined time window; cannot join ballot after that.
- Invitations will also be sent to relevant IEEE committees/subcommittees
- WG leadership will forward invitations to WG members and listservs
- Will also share with i2X FIRST

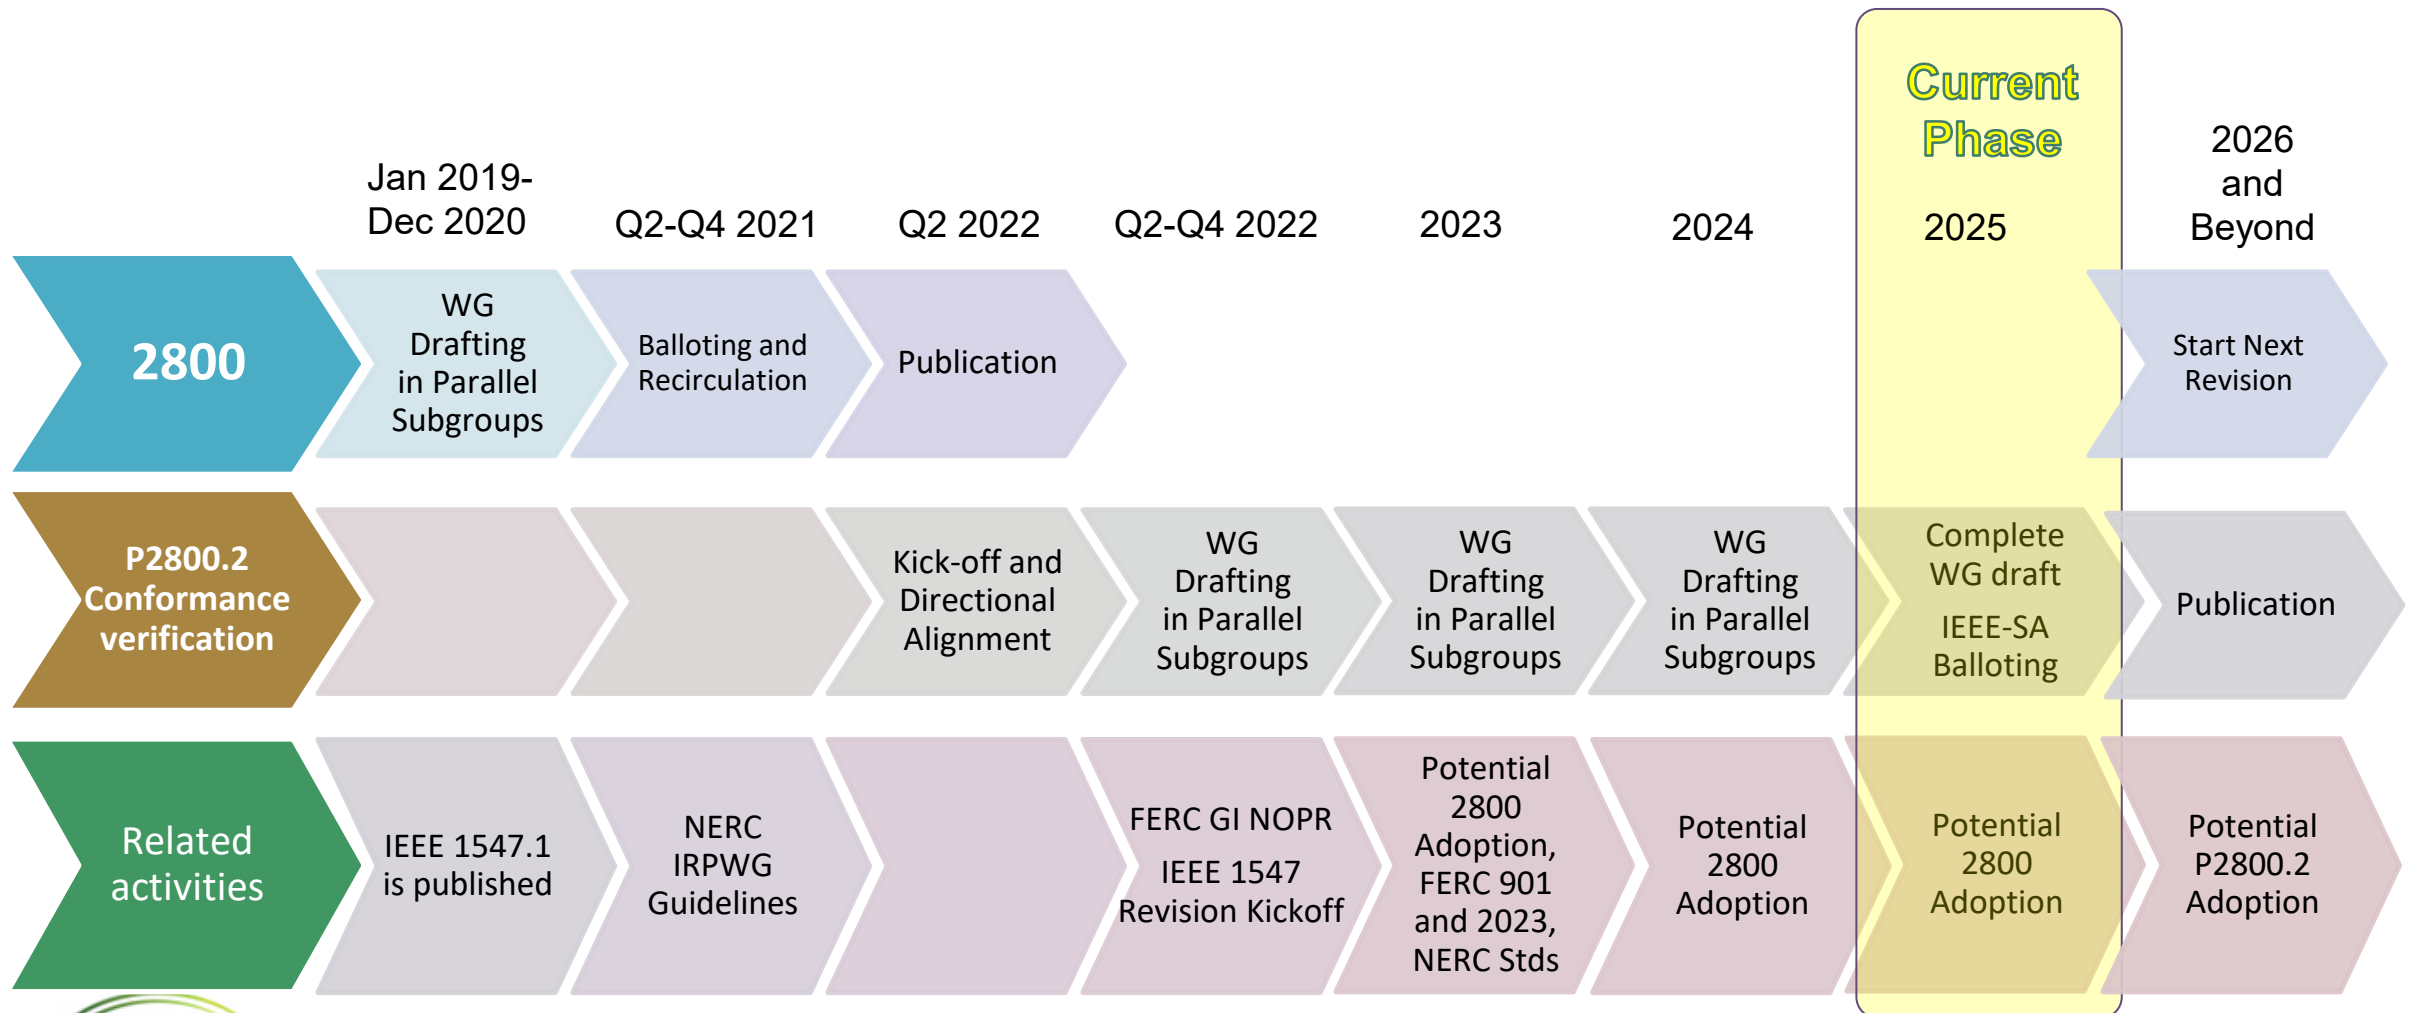

- Balloters are expected to review the draft and vote.
 - If you join ballot but don't vote, WG leadership will be annoyed.
- Negative votes must be accompanied by comments to be counted. Positive and abstain voters can also submit comments.

How To Express interest in IEEE myProject?

1. On the [myProject™ Home Screen](#), click on Menu and then on “Manage Profile and Interests”
2. Click on the Interests tab, then on “Add Groups”
3. Find P2800.2 under PES/EDPG per screenshot excerpts below
4. Click bullets under “Groups I Am Interested In” and follow instructions on screen

Group Name	Committee	Group Type	Groups I Am Interested In
+ IEEE Nuclear and Plasma Sciences Society	NPS	Society	
+ IEEE Nanotechnology Council	NTC	Society	
- IEEE Power and Energy Society	PE	Society	
+ Analytic Methods for Power Systems ⓘ	PE/AMPS	Standards Committee	<input type="radio"/>
- Energy Development & Power Generation ⓘ	PE/EDPG	Standards Committee	<input type="radio"/>
+ Project Administration ⓘ	PE/EDPG/ADMIN	Working Group	<input type="radio"/>
...			
- P2800.2 - Test and Verification of BPS-connected Inverter-Based Resources ⓘ	PE/EDPG/P2800.2 - T&V of BPS-connected IBRs	Working Group	<input checked="" type="radio"/>
Recommended Practice for Test and Verification Procedures for Inverter-based Resources (IBRs) Interconnecting with Bulk Power Systems ⓘ	PE/EDPG/P2800.2 - T&V of BPS-connected IBRs/2800.2	Project/Task Group	<input checked="" type="radio"/>

Potential 2800 Adoption Timeline and Next Steps

To get involved in IEEE P2800.2:

- To join Working Group:
 - If you have attended two WG meetings and want to be a WG voting member, email Manish Patel: Manish.P@ieee.org; CC Andy.Hoke@nrel.gov
 - If not, attend two meetings and request membership
- Join listserv for any subgroup or task force of interest
- WG member iMeet site: <https://ieee-sa.imeetcentral.com/p2800-2/home>
 - Contains draft documents, subgroup documents, references, etc.
- Public website: <https://sagroups.ieee.org/2800-2/>
